

SO EASY TO INSTALL!

Several features make installing the AMPRO 350 quick and easy:

- **Small size** — Miniature brain (3-1/4" x 1" x 2-1/2") and siren (3-1/4" x 3-3/8"), mount in the tightest spaces.
- **Positive/negative door lock/unlock outputs** — Outputs flip-flop between positive and negative. No need for external relays in most vehicles.
- **On-board, 3-wire flashing light relay** — For pos. and neg. parking light systems, as well as dual-circuit European cars. No extra relays, diodes, or wiring.
- **Siren or horn honking output** — Programmable steady (for siren) or pulsed (for positive or negative car horn) output. No external siren or relay required.
- **Remote start friendly** — Use the 3rd RF channel to remote start the car, and automatically bypass all trigger inputs except the door and hood/trunk.
- **On-board shock sensor with dual adjustments** — Separate adjustment controls (one for pre-intrusion, and one for trigger) make sensitivity setting simple.
- **Auxiliary sensor input** — Plug extra dual-stage shock, microwave, or glass break sensors directly into the alarm brain. No wiring necessary.
- **RF reception indication** — The LED lights every time the receiver receives a signal from the transmitter. Great for installation and troubleshooting.
- **All plug-in features** — LED, push-button, door locks, and auxiliary sensors all plug into the alarm brain for easy installation, simple troubleshooting.
- **Current sensing with fan override** — Fan override circuit prevents false alarms.
- **Patented Q.Q.T.** — Allows the testing of the doors, hood, and trunk without triggering the siren.

SO EASY TO SELL!

THE BATTLE IS OVER!

AMPRO™
MORE FEATURES, WITH FASTER, SIMPLER INSTALLATION!

Most alarms force you to choose between more features or easier installations. Now you can make the final knock-out and be the winner with the new AMPRO 350. The AMPRO 350 was specially designed with unique and incredible features such as EEPROM code-learning with RF Code Wash™, patented Stay-Safe Disarm™, 12 programmable features, and much, much more. On top of that, installations are now faster and simpler than ever with the miniaturized brain and siren, built-in dual-stage shock sensor, and optional plug-in features that can be added in a snap. With the AMPRO 350, you are the winner.

RF TRANSMITTERS

- Arm/disarm from up to 200 feet.
- Control 2nd and 3rd channel RF outputs.
- Control 2nd car installed with AMPRO 350.
- Panic protection from outside car.
- Quiet Mode™ overrides chirp.
- Sensor bypass and zone bypass.

BRAIN/RECEIVER

- 68 billion possible codes.
- RF Anti-Scan Protection (A.S.P.™).
- EEPROM code storage if power lost.
- Code learning of up to 4 remotes, and RF Code Wash™ deletes all previous codes.
- True Trigger™ ignores a sensor which triggers more than three times in 30 minutes.
- Patented Q.Q.T. Allows silent testing of alarm.

ON-BOARD ELECTRONIC SHOCK

- Revolutionary new design (patented).
- Electromagnetic principle.
- Dual-stage — Siren chirps if light tap detected, triggers if strong rap detected.
- Separate adjustments for pre-intrusion and trigger makes sensitivity setting simple.
- Completely adjustable for any-sized vehicle.

MULTI-TONE SIREN

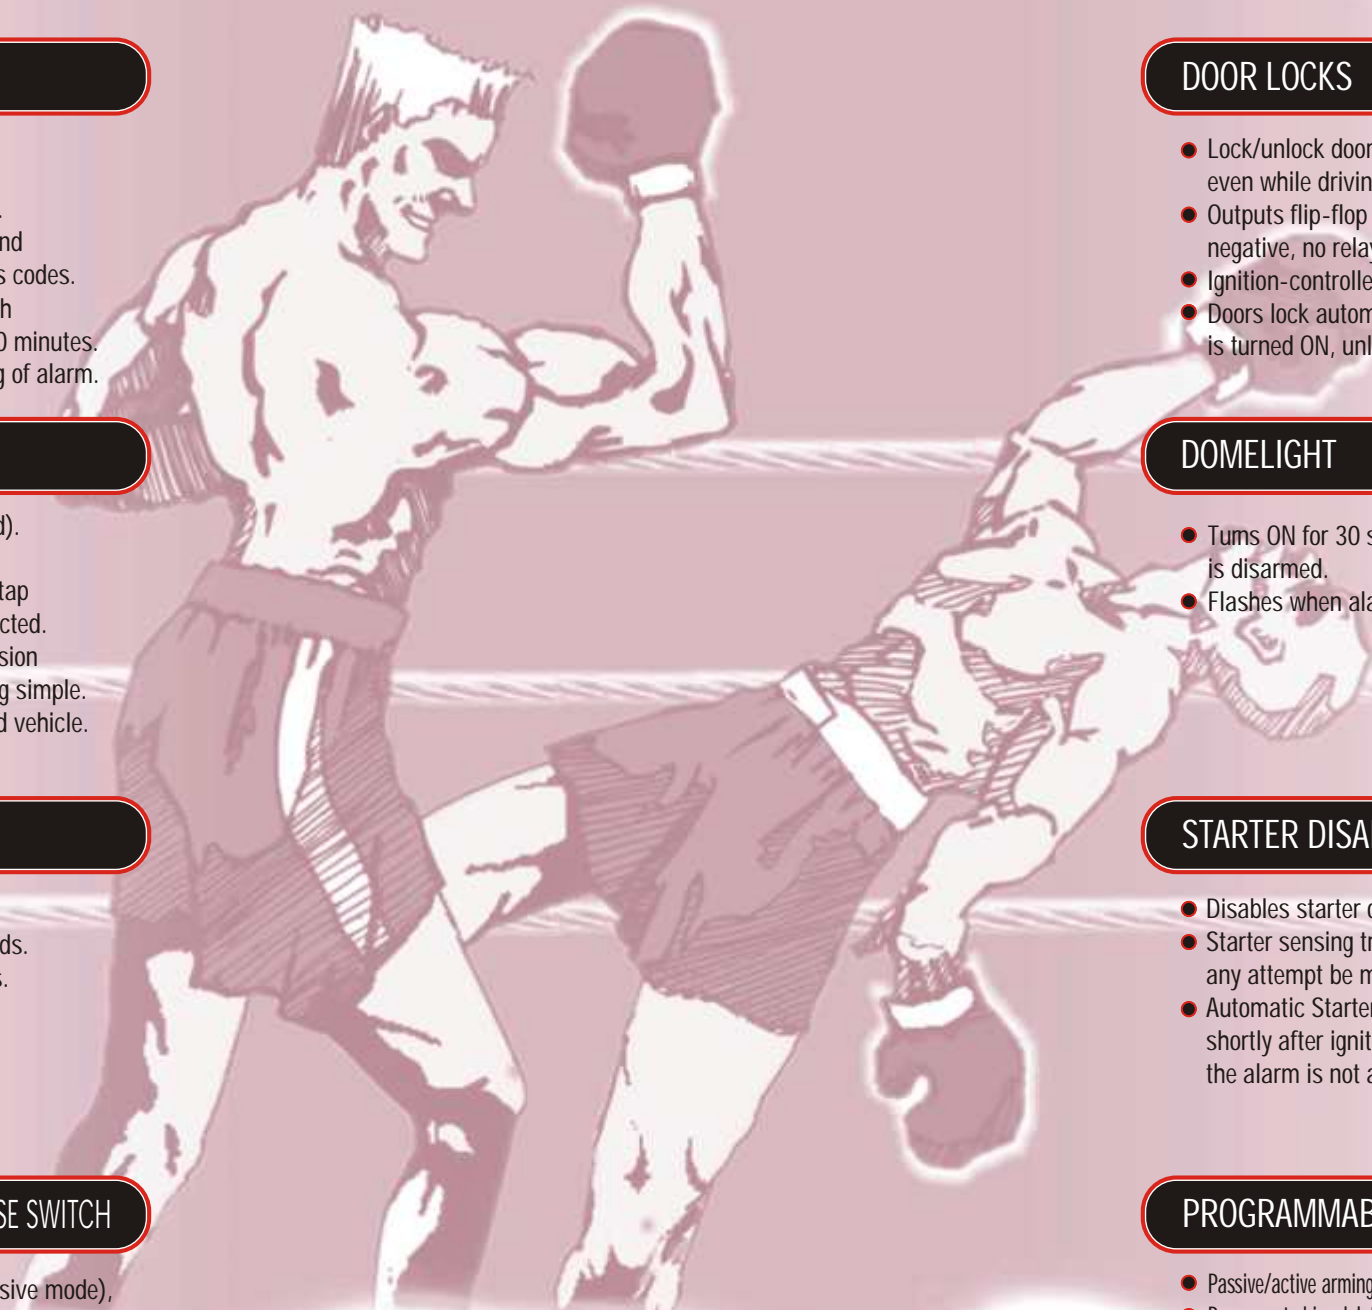

- High-output 128dB.
- Multi-tone siren, but no "toy" sounds.
- Sounds for 40 seconds, then resets.
- Chirps to indicate alarm armed or disarmed, pre-intrusion alert, zone bypass, sensor bypass, and more.
- Alarm can honk +/- car horns.

6-FUNCTION LED & MULTI-PURPOSE SWITCH

- LED indicates alarm arming (in passive mode), armed, and disarmed, plus valet mode.
- Also indicates triggered zone ID & RF transmitter reception (easy troubleshooting).
- Switch for valet, emergency disarm, programming, and code learning.

THE BATTLE IS OVER!

THE WINNER IS AMPRO!

PARKING LIGHTS

- Flash for armed, disarmed, pre-intrusion alert, zone bypass, sensor bypass, tamper.
- Flash continuously if alarm triggered.
- Pos/neg output, single- or dual-circuit.
- Dual Power Protection (D.P.P.™) provides back-up power to alarm.

DOOR LOCKS

- Lock/unlock doors via remote, even while driving or in valet.
- Outputs flip-flop between positive and negative, no relays needed for most cars.
- Ignition-controlled door lock/unlock.
- Doors lock automatically when ignition is turned ON, unlock when turned OFF.

DOMELIGHT

- Turns ON for 30 seconds when alarm is disarmed.
- Flashes when alarm is triggered.

STARTER DISABLE

- Disables starter once alarm is armed.
- Starter sensing triggers alarm should any attempt be made to start the car.
- Automatic Starter Disable disengages starter shortly after ignition is turned OFF, even if the alarm is not armed (programmable).

PROGRAMMABILITY

- | | |
|-------------------------------|----------------------------------------------|
| • Passive/active arming | • Siren and/or horn output |
| • Permanent chirp delete | • Sensor bypass alarm disarm for 2nd channel |
| • Normal/quiet chirp | • True Trigger™ |
| • Current and/or switch sense | • Automatic Starter Disable |
| • Manual/automatic door lock | • Door lock time 0.7/3.5 sec. |
| • Ignition-controlled locks | |
